

Advanced DBMS (ADBMS)

MSc IT Semester 1 - Practical Assignments

Practical 1: Customer Table

Objective: Create a Customer table with a primary key, add records, and perform Update and Delete operations.

► Step 1: Create Customer Table

```
CREATE TABLE Customer (  
    Customer_ID INT PRIMARY KEY,  
    Customer_Name VARCHAR(50),  
    City VARCHAR(50),  
    Phone VARCHAR(15)  
);
```

► Step 2: Insert Records and Display

```
-- Inserting multiple records into the table  
INSERT INTO Customer VALUES  
(1, 'Rahul', 'Ahmedabad', '9876543210'),  
(2, 'Amit', 'Palanpur', '9876543211'),  
(3, 'Priya', 'Mehsana', '9876543212'),  
(4, 'Neha', 'Patan', '9876543213');  
  
-- Display all records  
SELECT * FROM Customer;
```

► Step 3: Update and Delete Operations

```
-- Update Operation: Changing city for Customer 2  
UPDATE Customer  
SET City = 'Gandhinagar'  
WHERE Customer_ID = 2;  
  
-- Delete Operation: Removing Customer 4 from the table  
DELETE FROM Customer  
WHERE Customer_ID = 4;
```

Practical 2: Salesman Table

Objective: Create a Salesman table with a primary key, add records, and perform an ALTER table operation.

► Step 1: Create Salesman Table

```
CREATE TABLE Salesman (  
    Salesman_ID INT PRIMARY KEY,  
    Salesman_Name VARCHAR(50),  
    City VARCHAR(50),  
    Salary DECIMAL(10,2)  
);
```

► Step 2: Insert Records and Display

```
-- Adding salesman data  
INSERT INTO Salesman VALUES  
(101, 'Rajesh', 'Ahmedabad', 25000),  
(102, 'Suresh', 'Palanpur', 28000),  
(103, 'Karan', 'Mehsana', 30000);  
  
-- Display all records  
SELECT * FROM Salesman;
```

► Step 3: Alter Table Operation

```
-- Add a new column named 'Email'  
ALTER TABLE Salesman  
ADD Email VARCHAR(100);  
  
-- Check Modified Table  
SELECT * FROM Salesman;
```

Practical 3: Orders Table

Objective: Create an Orders table with a primary key, add records, and perform Update and Delete operations.

► Step 1: Create Orders Table

```
CREATE TABLE Orders (  
    Order_ID INT PRIMARY KEY,  
    Customer_ID INT,  
    Order_Date DATE,  
    Amount DECIMAL(10,2)  
);
```

► Step 2: Insert Records and Display

```
-- Inserting orders for customers  
INSERT INTO Orders VALUES  
(1001, 1, '2026-09-25', 1500),  
(1002, 2, '2026-09-26', 2500),  
(1003, 3, '2026-09-27', 3200),  
(1004, 1, '2026-09-28', 1800);  
  
-- Display all records  
SELECT * FROM Orders;
```

► Step 3: Update and Delete Operations

```
-- Update Operation: Modifying the amount for Order 1002  
UPDATE Orders  
SET Amount = 3000  
WHERE Order_ID = 1002;  
  
-- Delete Operation: Canceling/Removing Order 1004  
DELETE FROM Orders  
WHERE Order_ID = 1004;  
  
-- Final Display  
SELECT * FROM Orders;
```
