Practical Definition

Pra. No.	Topic	Definition
1	Reverse a Number	Reversing a number means arranging its digits in the opposite order.
2	Factorial of a Number	The factorial of a non-negative integer n is the product of all positive integers from 1 to n , denoted by $n!$.
3	Positive, Negative or Zero	A number greater than zero is called a positive number, a number less than zero is called a negative number, and a number equal to zero is called zero.
4	Fibonacci Series	The Fibonacci series is a sequence in which each term is the sum of the two preceding terms, commonly starting with 0 and 1.
5	Star Triangle	A star triangle is a pattern in which asterisks (*) are arranged in rows to form a triangular shape.
6	Reverse Star Triangle	A reverse star triangle is a pattern in which the number of asterisks (*) decreases in each successive row.
7	Number Triangle	A number triangle is a pattern in which numbers are arranged in rows to form a triangular shape.
8	Pyramid Pattern	A pyramid pattern is a centered pattern in which characters, numbers, or asterisks are arranged in the shape of a pyramid.
9	Largest of Two Numbers	Finding the largest of two numbers means comparing two given numbers and identifying the number with the greater value.
10	Leap Year	A leap year is a year containing 366 days. A year is a leap year if it is divisible by 4, except century years, which must be divisible by 400.
11	Prime Number	A prime number is a natural number greater than 1 that has exactly two positive factors: 1 and the number itself.
12	Swap Two Numbers	Swapping two numbers is the process of interchanging the values stored in two variables.
13	Odd and Even Number	An even number is a number that is completely divisible by 2, whereas an odd number is a number that is not completely divisible by 2.
